Manish Kumawat

Software Engineer

- Ahmedabad, India
- January 2000
- mjk16700@gmail.com
- +91 8238620129
- in IMK
- BurningTiles
- BurningTiles

SKILLS

Backend Development

Spring Boot Node JS

Express JS Postman

Frontend Development

HTML CSS React JS

Angular

Other

Algorithms Data Structure

Python MySQL MongoDB

Full Stack Git Cloud

EXTRAS

Certificates

- Gate 2021 Qualified
- TCS CodeVita Rank: **363**
- HackerRank Problem Solving, C/C++, Java
- Google HashCode, CodeJam

Activities

Competitive Programming

Teaching Programming

Typing Reading Art

I am a **software engineer** with more than 1.5 years of experience. I am skilled in *C, C++, Java, JavaScript, and Typescript* and possess strong *problem-solving* abilities with a deep understanding of *data structures* and *algorithms*. In addition, I have expertise in *Spring Boot, Rest APIs, Node.js, Express.js, Angular* and *React.*

WORK EXPERIENCE

Tata Consultancy Services   (July 2021 - Present)
Systems Engineer

As a backend engineer, I worked with technologies such as **Spring Boot, MySQL, Angular and Azure** to create and maintain software solutions for clients.

- Created *Rest triggers* and *Schedulers* at the beginning of the project.
- Designed and implemented a fully-functional *Rest API* with *authentication*.
- Implemented the ability to parse and validate *CSV data* and add it to the database.
- Ensured that the API could handle exceptions and created documentation using *Swagger*.
- Collaborated with the frontend team to implement new features, fix bugs, and improve performance.
- Successfully hosted the API on *Azure* using app service and SQL managed instance.
- The API is used by more than *1000* employees of the client.

EDUCATION

Silver Oak College of Engg. & Tech.   (August 2017 - July 2021)
B.E., Computer Engineering   9.4 CGPA

R.R. Dwivedi High School   (June 2015 - May 2017)
HSC (GSEB)   61.54 %

Sharda Vidhyalaya   (May 2014 - April 2015)
SSC (GSEB)   68.17 %

PROJECTS

PassMan
A mobile application for secure password management

- Utilized **React Native, JavaScript, Async Storage, Fingerprint Authentication** and **Brute Force Prevention** to ensure password security.
- Implemented features such as **password history, import/export passwords** and the ability to search and add remarks and links.
- Successfully launched the application, which is currently being used by over **50** individuals including myself.
